Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a masked expression cassette comprising a first and second strand, classifiable in class 435, subclass 320.1.
- II. Claims 7-12, drawn to a masked expression cassette comprising a first strand and a plurality of second strands, classifiable in class 435, subclass 320.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different expression cassettes that comprise different structures. The cassette of Group I may be a cassette that is double stranded and comprises a first and second strand such as a cloning plasmid vector, for example. The invention of Group II is drawn to a cassette that has a first strand that has several second strands bound thereto. The cassette of Group I could be used in cloning while the cassette of Group II could not, for example.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

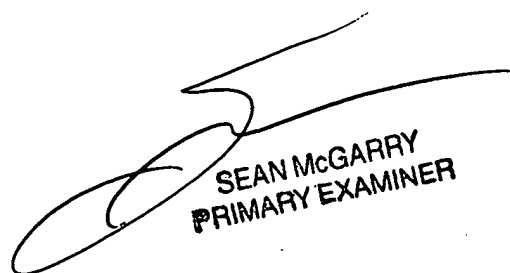

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
